

COURSE OVERVIEW

Many organisations are certified to several different management systems for different business needs and it is challenging to maintain different team for different systems. This course aims to overcome this challenge through a thorough overview and review of the management systems namely ISO9001, ISO14001, ISO22301, ISO27001 and ISO45001, their differences and similarities and how internal auditors can approach them in a structured manner. A highly interactive course with hands-on activities, discussions and lectures.

COURSE OBJECTIVES

At the end of this course, you will be able to :

- ⇒ Be familiar with the audit principles and process
- ⇒ Obtain a good overview of different management systems, the similarities and differences
- ⇒ Apply the techniques of internal audit

PRE-REQUISITE

Participants attending this course should have some fundamental knowledge of the management system principles and introduction to the ISO standards will not be discussed during this training.
