

ISO 37002 Introduction

Get introduced to ISO 37002 guidelines for a WMS

Why should you attend?

The ISO 37002 Introduction is a one-day training course that introduces you to the basic concepts of whistleblowing and provides an overview of the guidelines for implementing, operating, maintaining, and continually improving a whistleblowing management system (WMS) based on ISO 37002. It also presents the structure of ISO 37002 and a comprehensive description of the importance and benefits of a WMS.

This training course is intended for:

- Individuals aspiring to become whistleblowing management consultants or work in whistleblowing management
- Managers and members of governance, risk management, and compliance teams
- Individuals wishing to contribute in maintaining organizational integrity by establishing and maintaining whistleblowing mechanisms
- Employees looking to enhance their knowledge regarding whistleblowing and its importance to organizations, as well as their rights to confidentiality, support, and protection

Learning objectives

- This training course will help you understand the:
- Main concepts and definitions related to whistleblowing
 - Structure and elements of a whistleblowing management system (WMS) based on the guidelines of ISO 37002
